WIPRO TECHNOLOGIES

MAY 2021 — Present

Bengaluru, India

• PPP Team (Payment Pre-Processing)

- Engineered an event-driven payment workflow using Kafka and Spring Boot to handle over **100,000 B2B transactions** daily.
- Managed and monitored **multiple Kafka topics and partitions** for reliable processing across various payment stages.
- Integrated IBM MQ to streamline secure messaging and enable real-time transaction tracking.
- Operated in an Agile environment; served as the **senior-most developer** after the team lead, guiding junior team members.

• Auth-lite Team

- Developed and deployed a robust two-factor authentication (2FA) API, resulting in a **30% boost in security compliance**.
- Designed a seamless integration layer between frontend and backend systems, reducing interface errors by **40%**.
- Collaborated within a cross-functional Agile team to deliver security enhancements with rapid sprint cycles.

• E-Commerce Team

- Delivered multiple enumeration updates and developed new API endpoints, enabling **faster client onboarding by 25%**.
- Refactored and optimized legacy codebases to adapt to evolving business needs, improving system performance by **15%**.
- Contributed to Agile ceremonies including sprint planning, retrospectives, and daily stand-ups.

• Service Team

- Led coordination with internal teams and external vendors for timely certificate renewals and SLA compliance.
- Executed disaster recovery drills and maintenance operations, achieving **99.99% system uptime**.
- Managed vendor communications and escalations to ensure uninterrupted services and regulatory adherence.

• Whitechapel Team

- Diagnosed and resolved production issues through in-depth code reviews and troubleshooting, cutting resolution time by **20%**.
- Supported DevOps teams to enhance CI/CD pipeline reliability and optimize release processes.

• Internal Spring Boot Project - Banking Portal

- Designed and developed a secure banking portal to detect and mitigate fraud patterns using real-time transaction rules.
- Utilized Java, Spring Boot, Hibernate, Spring JPA, JDBC, MySQL, HTML, CSS, Postman, and SOAP UI to deliver a scalable backend system.
- Achieved **80% faster onboarding of fraud detection rules** compared to the previous manual process.
